about nine inches square, and scenre it by liga-ture around the mouth of an ordinary tumbler, so as to leave a cap-shaped depression of flaunel within the tumbler to about half its depth. In

so as to leave a sup-shaped depression of flauned within the tumbler to about half its depth. In the flannel cup so constructed pieces of ice may be preserved many hours, all the longer if a piece of flannel four to five inches square be used as a loose covering to the ice-cup. Cheap flannel, with comparatively open meshes, is preferable, as the water easily drains through it, and the lee is thus kept quite dry. When good flannel with close texture is employed, a small hole must be made in the bottom of the flannel cup, otherwise it holds the water, and facilitates the melting of the ice, which is, nevertheless, preserved much longer than in the naked cup or tumbler. In a room 60 deg. F., Dr. G. made the following experiment with four tumblers, placing in each two ounces of ice, broken into pieces of the average size of sucking. In tumbler No. 1 the ice was loose. It had all melted in two hours and fifty-five minutes. In tumbler No. 2 the ice was suspended in the tumbler in a cup made, as above discribed, of good Welsh flannel. In five hours and a quarter the flannel cup was more than half filled with water, with some pieces of ice floating in it; in another hour and a quarter (six hours from the commencement) the flannel cup was nearly filled with water, and no ice remained. In tumbler No. 3 the ice was suspended in a flannel cup made in the same manner and of the material as in No. 2; but in No. 3 a hole, capable of admitting a quill pen, had been made in the bottom of the flannel cup, with the effect of

in a flanuel cup made in the same manner and of the material as in No. 2; but in No. 3 a hole, capable of admitting a quill pee, had been made in the bottom of the flanuel cup, with the effect of protracting the total liquefication of the two ounces of ice to a period of eight hours and three quarters. In tumbler No. 4 two ounces of ice were placed in a flanuel cup made, as above described, of cheap, open flanuel (10d per yard), which allowed the water to drain through very readily. Ten hours and ten minutes elapsed before all this ice had melted.

A a reserve supply outside the bedroom door can be secured by making a flanuel cup, on the plan above described, in a jug, and filling it with little lumps of ice—care being taken that there is space enough below the bag to allow the water to collect and leave the ice dry. This provision will allow the ice to be used during the hottest night, without the supply failing, or the patient being disturbed—two very important considerations. The real therapeutic benefit of ice is only produced in some cases by its free use, and its soothing and stilling effect must be aided by the most perfect surrounding quiet.—Rural New Yarker.

An eminent physician in Philadelphia furnishes the public with the following rules in the treatment of cholera infantum: Keep the child cool by means of frequent and protracted bathing in water cooler than the atmosphere. If the temperature of the atmosphere is very high—say about from 80 to 90 degrees Fahrenheit, or if it is close and oppressive—the bathing should be repeated a number of times in the course of the day, the water for this purpose being regulated to about 65 or 70 degrees. Sometimes, instead of immersing the child in the water, it may suffice to sponge it copiously. Thus treated, the child will feel cool and comfortable for several hours, after which the process may be repeated, there being no cause for apprehension whatever that the little one will be weakened thereby, (as is sometimes erroneously supposed,) even if kept in the water for half an hour at a time. The object of this bathing is to substitute a surrounding medium, the temperature of which may be regulated at will, for the atmosphere whose temperature is not so readily modified.

As to the diet, the most important article of food is milk, accompanied, after the tenth month of the infant's age, with a small quantity of crashed water-cracker soaked in the milk in the form of a "pap." Great care should be taken not to overfeed bables during the warm seasou, as the function of digestion at such time is just as much averse to being overworked as are the functions of the muscles.

The milk that is used should be as fresh as it

tion of digestion at such time is just as much averse to being overworked as are the functions of the muscles.

The milk that is used should be as fresh as it can possibly be had. If a cow could be milked every time that the baby needs feeding, it would be all the better. At all events the milk should be freshly drawn from the udder at least twice a day, and to facilitate the preservation should be immediately boiled, and then cooled and kept on ice in closely covered vessels. All the water, too, that is given to infants for drink should first be boiled, and, when cooled and settled, carefully poured off from the top, bottled, and kept on ice. The process of boiling purifies and distills the water, and destroys the vitality, to a great extent at least of the parasites it may have contained. But to do still more towards neutralizing the injurious effects of the water, a few drops of pure Cognac brandy should be added to every drink given the infant. Sometimes a few drops of lemon juice (if the child is a vent old or overy may be added; or a

Semetimes a few drops of lemon juice (if the child is a year old or over) may be added; or a little camomile tea in the proportion of a teaspoonful to a wineglassful of water. A very little sugar also should always be added.

Of water thus modified the child may drink without let or hindrance, guarding only against too large quantities at a time. In fact the water thus given will aid in cooling the blood from within, and diminishing its tendency towards congestion, even as the lotions and bathing exert this effect from without.

Cold in the head.—At last a cure is found for cold in the head. Dr. Poillon, a French physician, says it can be cured by inhaling hartshorn. The inhalation by the nose should be seven or light times in five minutes. eight times in five minutes.

Remedy for burns.—An exchange says that by laying a piece of charcoal on a burn the pain will immediately subside. By leaving it on one hour the wound is healed, as has been demonstrated on several occasions. It will not cost

A health producing vegetable.—The acid of the tomato stimulates the liver to work off the surplus bile of summer. It is a nutritious article anrelus bile of summer. It is a nutritious action of diet, and can be prepared in so many different ways that it never becomes monotonous to the palate, or never need to be so, if proper care and

Relief for a troublesome cough.—Gargling the throat with tepid water will often afford relief from a troublesome cough. The ordinary cough mixtures—troches, lozenges and other nostrums, when injudiciously used, load the stomach and seriously interfere with digestion, thus indirectly increasing the evil which they were designed

Salt as a tooth powder.-If, while examining Salt as a tooth powder.—If, while examining under the microscope, a drop of water containing infusoria, you introduce a grain of salt, the effect seen will be the instantaneous death of the creatures. The knowledge of this property of salt may be turned to account in several ways; among the rest it suggests an excellent tooth powder. If it be true, as asserted, that the matter which is formed on the tests is the receptacle of animalcule, and that these are the real agents in producing carious teeth, din a real agents in producing carious teeth, dip a moistened brush in common salt, and you have at once the cheapest and most preservative of

Cookies.—Two cupfuls sugar, one cupful but-ter, one cupful sweet milk, one teaspoonful soda, two teaspoonfuls cream tartar, flour to roll; rub butter and sugar in the dry flour, as if for

Sick Headache.—Two teaspoonfuls of finely powdered charcoal drank in half a tumbler of water will often give relief from sick headache when caused, as in most cases it is, by a supera-bundance of acid in the stomach. It is very

Moths—A small piece of paper or linen moist-ened with spirits of turpentine and put into a bureau or wardrobe for a single day, two or three times, is said to be a sufficient preventive against

Syrups for Soda Water—What we Drink.

—The New York Graphic says: The syrups sold at many soda water fountains demand some attention from those having charge of the public health. Will some philanthrepist and investigating spirit with abundance of leisure make an assay of these fragrant mixtures, and give the result to the public? The very latest intelligence from the soda fountain reads that some red syrups tings the glasses, and what is more suggestive and suspicious, the color does not wash off. As a glass dye it seems a success, but there is too much hint of a mordant in this phenomenon to warrant its plentiful introduction into the human stomach. The sugar used in the syrups is heating for the system, and tends strongly to acidity of the stomach, but the additional dye and drug used to counterfeit strawberry or cherry must serve as vigorous aids in promoting our ry must serve as vigorous aids in promoting our National dyspopsia.

ALL do not know that lemons sprinkled with loaf-sugar almost completely allay feverish thirst. They are invaluable in the sick-room. Invalids affected with feverishness can safely consume two or three lemons a day. A lemon or two thus taken at "tea-time" is recommended as an entire substitute for the ordinary supper of summer, and will often induce a comfortable sleep and will often induce a comfortable slees through the night, and give a good appetite for

## The fun of the Thing.

GOING WEST. "Pull up your stakes," the old man said;
"Why don't you Westward go,
And start a farm!" The youth replied,
"I would, if Idabo."

"Chivairons boy!" his sire exclaimed,
"Your plack full well I know;
I'll help you out, if that is all
You need. Here, Ivanhoe!"

—New York Communical Adv

He started out, and Westward west, Inspired with youthful arder; But something whispered, at Cheyenne, "Would you go N.e-vada?"

"I know I said if Idaho,
I would not sak for mower;
But now that I can take my pick,
My dream is surely ore!"

—Botten Duily Ad

This ore, I find, to get is hard;
I owe for all my rum;
In fact, they say that you, my pard,
I ow a goodly sum.

He said he'd tar and feather me,
Until to him I said,
"Utok and feather me, and see
How long before you're dead."
Boston Globe

Hayee' Progress.
Trit trot to Boston,
To have a little shake;
Trit trot back again,
For Iowa's awake."

Take Which Hond You Please.

John Randolph was travelling in a part of Virginia with which he was unacquainted. In the meantime he stopped during the night at an iun at the forks of the road. The innkeeper was a fine old gentleman, and no doubt one of the first families of the Old Dominion. Knowing who his distinguished guest was, he endeavored to draw him into conversation, but failed in all his efforts. But in the morning when Mr. Randolph was ready to start, he called for his bill, which on being presented, was paid. The landlord, still anxious to have one conversation with him, began as follows:

"Which way are you travelling, Mr. Randolph i"

dolph ?"
"Sir," said Mr. Raudolph, with a look of dis-"I asked," said the landlord, "which way you

re travelling !"
"Have I paid my bill !"

Do I owe you anything more ?"

"No."
"Well, I am going just where I please—do you understand?"
The landlord by this time got somewhat excited, and Mr. Randolph drove off. But, to the landlord's surprise, the servant returned to enquire which of the forks of the road to take. Randolph not being out of hearing distance, the landlord spoke at the top of his voice:
"Mr. Randolph, you don't owe me a cent; just take which road you please."
It is said the air turned blue with the curses of Randolph.

A Knotty Text.

There was once an itinerant preacher in West ennessee, who, possessing considerable natural There was once an itinerant preacher in West Tennessee, who, possessing considerable natural eloquence, had gradually become possessed of the idea that he was also an extraordinary Biblical scholar. Under this delusion he would very frequently, at the close of his sermons, ask any member of his congregation who might have a "knotty text" to unravel, to speak it, and he would explain at once, however much it might have troubled less distinguished divines. On one occasion, in a large audience, he was particularly pressing for some one to propound a text; but no one presuming to do so, he was about to sit down without any opportunity of showing "his learning," when a chap back by the door announced he had a Bible matter of great concern which he desired to be enlightened upon. The preacher, quite animatedly, professed his willinguess and ability, and the congregation was in great excitement.

willinguess and ability, and the congregation was in great excitement.

"What I want to know," said the outsider, "is, whether Job's turkey was a hen or a gobbler."

The "expounder" looked confused, and the congregation tittered, as the questioner capped the climax by exclaiming, in a lond voice—

"I fotched him down on the fast question!"

From that time forward, the practice of asking for difficult "passages" was abandoned.

What Killed Him.

A few years ago, when Judge Gould, of Troy, lately deceased, was holding court in that city, a prisoner was being tried before him for willful murder, in causing the death of a man by a pistol shot. An eminent physician and surgeon was on the stand as a witness for the defence.

The prisoner's counsel, an adroit lawyer, attempeted to show that the man, who lived some little time after being shot, might have died from some other cause, and examined his witness after this style:

"Doctor, would not such a thing cause death?"

"Oh, yes, sir."

"Well, doctor, might not this man have died from such and such causes?"

"Well, doctor, might not this had agreed from such and such canses?"

"Oh, yes, he might."

"This is quite sufficient for us," exclaimed the defendant's counsel, with an air of triumph, twirling his eye-glass.

Judge Gould turned in his seat, bent his large, been nenetrating black eye full on the witness, keen, penetrating black eye full on the witness, and said a little sharply:
"Doctor, you have now told us what might have caused this man's death; what did cause his death?"

"The bullet, sir," answered the witness. This

"What do the Arabs of the desert live on, pa ?"
asked a roguish little girl of her father.
"Fudge! Nelly, that's an old conundrum.
They live on the sand which is (sandwiches)

"Yes; but, pa, how do they get them?"
"Well, really, Nelly, I give it up."
"Why, pa, don't you know that the sons of
Ham were bred and mustered in the wilder-

"Come, come, my daughter, that is too killing.
Don't say another word."
"Oh, yes; do tell me what they eat on their sandwiches."
"Eat on 'em! Why, what do they eat on

"Butter, to be sure."
"Butter!" How do they get butter!"
"Why, you know, pa, that when Lot's wife
was turned into a pillar of salt, all the family
but her ran in the wilderness."

THE skeleton of a cat walked into Ryan's store THE skeleton of a cat walked into Ryan's store at Hohokus. Ryan, seeing her, bawled out, "Mickey, didn't I tell ye a month age to fade that cat a pound of mate a day until ye had her fat?" "You did, and I'm just fading her a pound." "Has that cat ate a pound this morning?" "Yes, sir." "Shure, I think it's a lie you're telling. Bring me that scales. Now bring me that cat." The cat turned the scales at exectly one pound. "There, didn't I tell ye she had caten a pound of mate this morning?" "All right, my boy; there's yer yound of mate, but where's the cat?"

A CITIZEN of Indiana having occasion to go home rather unexpectedly a few nights since, caught a gentleman acquaintance in the act of kissing his wife. On relating the circumstance to a friend, he was asked if he punished the guilty couple, and replied: "No, not exactly, but they must have seen from the way I slammed the door that I was not satisfied."

Norwich Herald: A Paris woman, who ten years ago was wealthy and bathed in a solid silver bath tub, is now a helpless paralytic, covered with rage and consumed by a rage for tobacco. Our wealthy readers should heed this warning, and never bathe in a solid silver bath tub. A malachite bath tub lined with gold is good enough for us.

ough for us. An Ohio editor was rendered insane while going home the other night, to hear the following words come from a dark porch, on a shady street:
"Oh! John, I wonder if that mustache feels as good on your lips as it did on mine?" John's answer he did not wait to hear. Moral—don't make love when a reporter is around.

A MAN wrote to his friend abroad, asking him to purchase books. He neglected to execute the commission; but fearing that his friend might be offended, he exclaimed, when next they met: "My dear fellow, I never got the letter you wrote me about the books."

WHILE two Ohio tramps were working to pay for their dinners the other day, they were both struck by lightning and killed. It was the first time the lightning ever got a lick at a tramp at work, and it struck as if it knew it was going to be the last.

THERE are times when all of a woman's solf-possession and dignity are required. That is when she shows her first baby, a hare-lipped one, to an old beau whom she had jilted for the sake of her present husband.

"The prisoner at the bar seems to have a very smooth face," said a spectator to a jailor. "Yes," replied the jailor, "he was ironed just before he was brought in."

Ou, Hornor!—Tommy (suddenly, on his way home from church)—What did you take out of the beg, mamma? I only got sixpence! Look here!

## Great Remedies!

Dr. JOHN BULL

MANUPACTURER AND VENDER OF THE

CRLEBRATED

FOR THE CURE OF

ACUE AND FEVER

OR CHILLS AND PEVER.

for it a supe riority over all remedies ever offered to the Ague and Fever, or Chills and Fever, whether of short cure, and whole families have been cured by a single bota, bowever, prudent, and in every case more certain to cine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of Bull's Vegetable Family Pills will be sufficient.

#### BULL'S

#### SARSAPARILLA

Read the following extract of a letter from Mrs. Rivers wife of Rev. Dr. Rivers, one of the most learned, eloquent and popular Ministers of the Methodist Episcopal Chur and who is at present stationed at Broadway Church, Louis-

LOUISVILLE, KY., Oct. 8, 1809. Dr. John Bull-Dear Sir : Many thanks to you for the nedicine you have so kindly given me. I have been a reat sufferer for years, and had the advice of various physicians. Some pronounced my spine, some my lungs and some my heart to be the seat of my disease. I have been burnt, blistered and cupped until I had become disseartened. Several very eminent physicians who exam ined my spine, informed me that I was threatened with eton would relieve me. I had a perfect horror of that, and was besitating about having one inserted, when you kindly sent me your Sarsaparilla, which I immediately egun to take three times a day. I had suffered terribly with a most acute pain in the right side of my head, essecially when I would read or write for any length of ime, and on rising to my feet I would be perfectly blind for several minutes, and would have to hold to something to prevent falling.

I am most happy to inform you that the pain in my ead is entirely relieved; I suffer but seldom with my spine, and then not so acutely. My appotite is good indeed for the first time in my life I enjoy my dinner ore than any weal during the day.

You kindly sent me four bottles again last night, and I egan again this morning, and I hope to be entirely rewed. Please accept my beartfelt thanks and

Very truly your most grateful friend, M. B. C. RIVERS.

marantee to be genuine and written by the persons rhose names they bear.

Do not suffer yourself to be imposed on. Don't be rawn away after new and doubtful experiments. Don't isk your health by letting novices experiment upon you

My Sarasparilla has stood the test for twenty-five years; is is still the Sarsaparilla of the day, and of the age, towering over all others in popularity, and in its curative

extracts of Sarsaparilla eo-called. Remember it is Dr. John Bull's Sarsaparilla, of Louisville, Ky., that is the old and reliable remedy for impurities of the blood and crofulous affections. Always bear that in mind.

#### ANOTHER TESTIMONY.

BENTON BARRACKS, Mo., April 30, 1966. Dr. John Bull-Dear Sir: Knowing the efficacy of your Sarmparilla, and the healing and beneficial qualities it seases, I send you the following statement of my case : I was wounded about two years ago, was taken prisone and confined for sixteen months. Being moved so often my wounds have not healed yet. I have not sat up a moment since I was wounded. I am shot through the hips. My general health is impaired, and I need something to assist nature : I have more faith in your Sarsaparilla than anything else. I wish that which is genuine. Please exproces me half a docen bottles, and oblige,

CAPT. C. P. JOHNSON.

P. S .- The following was written April 30th, 1866, by Mrs. Jennie Johnson, mother of Capt. Johnson : Dr. John Bull-Dear Sir: My husband, Dr. C. S. Johnson, was a skillful surgeon and physician of Central New York, where he died, leaving the above C. P. Johnson to my care. At thirteen years of age he had a chronic diarrhers and scrofuls, for which I gave your Saraparilla. It cured him. I have for ten years recommended it to many in New York, Ohio and Iowa, for acrofula, fever sores, and general debility. Perfect success has attended it. The ourse effected in some cases of ecrefule and fever fearful of getting a spurious article, hence his writing to you for it. His wounds were terrible, but I believe he

# TONIC SYRUP Mason & Hamlin

CABINET ORGANS Unanimously assigned the

SEVERAL REQUISITES"

Of such Instruments! The MASON & HAMLIN ORGAN CO. have the honor to announce that the organs of their manufacture have been unanimously assigned "the FIRST RANK in the SEVERAL REQUISITES of instruments of the class" by the Judges at the CENTENNIAL EXHIBITION at Phil. adulphia, 1876, and are the ONLY INSTRUMENTS OF THIS GENERAL CLASS AWARDED THIS RANK. This is after the severest competition by the best makers, before one of the most competent juries ever assembled. They have also received the MEDAL, but, as is well known, medals of equal merit have been awarded all articles deemed worthy of recognition; so that it will be easy for makers to advertise that they have received "first medals."

sy for makers to advertise that they have received "first media."

The differences in competing articles, and their comparative excellence, are recognized in the Reports of the Judges, from which the following is an extract:

"THE MASON & HAMLIN ORGAN CO."S exhibit of Reed Grymus and Harmoniums shows insuruments of the FIRST RANK IN THE REVERAL REQUISITES OF INSTRUMENTS OF THE GLASS, viz. Smoothness and caunt distribution of tence, acope of expression, resonance and singing quality, freedom and quickness in action of keys and bellows, with thereughness of exciton." (Rigned by all the Judges.) The Mason & Hamlin Organs are this declared to rank first, not in one or two respects only, but in the SEVERAL ERQUISITES of such instruments, and they are the ONLY ones assigned this rank. This triumph was not unexpected for the Mason & Hamlin Cabinet Organs have uniformly been awarded the highest honors in competitions in America, there having been scarcely six exceptions in hundreds of competitions. They were awarded highest honors and
